Experience

DATA SCIENCE CONSULTANT

Sep 2024 - Current

Management Solutions GMS

São Paulo, Brazil

- Developed and optimized credit risk models, processing large datasets with PySpark along with other tools such as Databricks and SAS in order to assess default probabilities for financial institutions.
- Built and analyzed classification trees and regression models using scikit-learn and XGBoost, implemented other machine learning models using PyTorch and TensorFlow. Conducted exploratory data analysis and feature engineering to improve model accuracy and ensure training data quality.
- Contributed to developing a LangChain RAG model for document validation and LLM pipelines for sentiment analysis and automated data-quality checks, enhancing forecasting accuracy.

JUNIOR DATA ANALYST

Mar 2024 - Sep 2024

Seed Digital SA

São Paulo, Brazil

- Analyzed data collected by digital sensors and organized the data in professional dashboards with Excel and Power BI to identify trends and generate business insights.
- Executed SQL queries to extract, clean, and manipulate datasets, enabling accurate reporting, trend analysis, and the development of data-driven recommendations to solve company problems.
- Built and refined forecasting models using Facebook Prophet to support business decision-making. Used statistical and machine learning techniques such as outlier detection and exponential smoothing to improve predictive accuracy and deliver best solutions to clients.

Education

UNIVERSIDADE ESTADUAL PAULISTA

Mar 2022 - Sep 2024

Master of Science (Physics)

São Paulo, Brazil

UNIVERSITY OF BRASILIA

Aug 2017 - Dec 2021

Bachelor of Science (Physics)

Brasilia, Brazil

Certificates

AWS MACHINE LEARNING SPECIALTY

Apr 2025

- Understanding of machine learning principles and their implementation using AWS services. Able to design, train, and deploy models within the AWS ecosystem.

AWS CLOUD PRACTITIONER

Dec 2024

- Skilled in core AWS services, cloud security, pricing models, and cost optimization. Capable of supporting cloud initiatives and aligning AWS solutions with business objectives.

Additional

Language Skills: Portuguese (Native), English (C2), German (B2)

Technical Skills: Python, SQL, Spark, Pandas, XGBoost, Numpy, R, Keras, MLOps, Scikit-learn, SageMaker

Volunteer Experience: Tutor during the IV Summer School of ICTP-SAIFR for Young Physicists teaching students fundamentals of physics and algorithms for scientific research.

Interests/Hobbies: Marathon running, language learning, digital drawing and illustration.
